Moose Jaw, Sask.**

**4 miles West of Moose Jaw on
Trans-Canada Highway**

Foreword

Welcome to LaBatte Simmentals 37th Annual Spring Bull & Female Sale on Friday, March 3rd, 2017 at Johnstone Auction Mart, 4 miles west of Moose Jaw, SK on #1 Highway.

We'd really like to thank again all the bidders and buyers from our past sales for the continued support and effort you make each year to attend our sale. It is greatly appreciated. The cattle market is rebounding nicely from its down turn this summer and fall. Calf prices, feeder cattle and cull cow prices made a big upward swing late in the year and early 2017. The Simmental and Simmental cross calves are still in high demand and bring premiums. At the commercial bred heifer sales this November and December, the Simm-Angus females were definitely the sale features and brought big premiums for the owners. The Simmental breed offers the commercial industry its high maternal traits, milk and muscle, superior performance and carcass value. From the commercial producer to the feedlots and to the slaughter plants, Simmental genetics are in high demand.

Last year we told you about our new venture of buying a ranch five miles north of our place and running commercial cows on it. Our son Lynlee and his wife Hayley are equal partners in this ranch and Lynlee has taken on most of the responsibility for running it. We will be calving out about 220 commercial cows this late spring, all bred to Simmental bulls. It's run quite different from our purebred operation in some ways, calving in May and June, winter bale grazing and turning bulls out on the 1st of August. But we will still look for the same traits as our purebred operation – acceptable calving, performance, muscle and structural correctness and temperament.

Our bull sale offering this year along with Meadow Acres Farms will consist of close to 100 bulls in total, polled, thick, meaty red and black bulls and a handful of red goggle eyed Fullblood Fleckvieh bulls. They are sired by some of the industries leading sires such as El Tigre, Lotto, Red Zone, Royal Red, Horizon and Vegas. We strive to produce the right kind of bulls for our seedstock producers and commercial customers. Bulls that have fleshing ability, lots of middle and top, high maternal traits, good temperament and structurally good on their feet and legs. Our guest consignor, Meadow Acres Farms, have the same philosophy as us and same goals as us of always trying to be better at providing high quality Simmental beef bulls to the livestock industry.

If you are unable to attend the sale, give myself or Meadow Acres Farms or any of the sale staff a call to have the sale offering evaluated for you. We can be reached the day prior and sale day on our cell phones: Barry 306 815-7900 or Dustin 306 487-7510 or Johnstone Auction Mart at 306 693-4715. If you have questions earlier give us a call on our cells or our home numbers. The sale will also be broadcast live on dlms.ca, so contact Mark Shologan for more information and help getting approved for bidding, phone number 780 699-5082. We welcome your visit to our farms anytime to see the bulls and heifers first hand. LaBatte Simmentals will have sixteen outstanding red and black polled open heifers for the sale, sired by El Tigre, Soda Pop, Dillinger, Red Zone and Vegas.

Come join us Thursday night at the Heritage Inn in our hospitality room for some socializing and laughs. We look forward to seeing you on Friday, March 3rd at Johnstone Auction Mart, Moose Jaw, SK. Please join us for a complimentary dinner prior to the sale and also after the sale for some socializing, refreshments and snacks. Best of luck in 2017 and hope to see you sale day.

Barry

P.S. Grandkids are doing great as usual. They're growing up so fast. Brodyn, our oldest, is a teenager now, is interested in the cattle and is taller than Wade now. Oh, I guess that doesn't mean much. LOL. The boys are all involved in hockey and all on different teams. They're involved in 4-H Beef and Grain also. The girls just went on a big trip to Disneyworld in Florida with Janalee and Tim and had a blast. They're involved in gymnastics and karate. We're lucky to have all our grandkids living so close to us, as we get to watch them grow up. They make us laugh and be proud grandparents.

Health

All bulls will be scrotal measured and palpated. Bulls over 12 months of age at time of testing will be semen tested.
Bulls under 12 months of age at time of testing will be semen tested prior to delivery. Weights will be posted sale day. All bulls and heifers were given Cattlemaster 4, Somnustar PH and Fortress 7 in June and boosted with same in September. All were treated with Ivomec Pour-on in September and January.

"Sight Unseen"

Purchase Program

If you are unable to attend the sale but are interested in our bulls give Barry or Dustin a call and they will personally go over the bulls and your program with you. They will recommend which bulls they think would meet your satisfaction and refer you to one of their sale staff.

In-Herd Semen

LaBatte Simmentals & Meadow Acres Farms reserve the right to collect semen on any bull sold through this sale. The semen collection will be at the seller's expense and the buyer's convenience. Any semen collected will be for in herd use only.

Delivery

At the buyer's option and risk, LaBatte Simmentals and Meadow Acres Farms will take purchaser's bulls home, feed them under their management and deliver them FREE anywhere in the prairie provinces to your nearest central location. We will do our utmost to deliver them right to your yard. Delivery will take place between April and the middle of May. For bull buyers outside the prairie provinces, bulls will be delivered at a reasonable charge. The bulls are the property of the buyer as soon as they are sold. Therefore, buyers must insure their animals for the time they are at LaBatte and Meadow Acres Farms. The heifers will be delivered as soon as possible after the sale.

If you are unable to attend our sale, please join us by viewing the sale live online at www.dlms.ca. For more information and help getting approved for bidding, contact Mark Shologan 780 699-5082.

Guarantee

All animals will carry the standard breeding guarantee as specified by the Canadian Simmental Association. At no time shall the seller's liability exceed the purchase price of the animal.

Video

Video of sale bulls will be available. For LaBatte Simmentals go to www.labattesimmentals.com and for Meadow Acres Farms go to www.meadowacresfarms.com or www.dlms.ca to view.

Terms & Conditions

The sale will be conducted under the standard Johnstone Auction Mart Ltd. Terms & Conditions.

Accidents

Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

This homo polled son of Vegas is out of one of our elite cow families, the Pocahontas 68M family. Her Accelerator daughter, 163X, is sending her third bull to our annual bull sale, and with other sons working in the herds of Stolson Farms in Hodgeville, SK and Roger Schroeder in Baldwin, ND. We have four full sisters sired by Accelerator that are all really good and very similar in type. They are a result of flushing IPU Pocahontas 68M to Accelerator. They're high producing mothers that have raised some of our high dollar cattle. 5D himself is very smooth and loose made, deep bodied and attractive. He is sired by the \$87,000 LFE Vegas bull ourselves and Oberles purchased as the high selling red bull at Lewis Farms 2015 Bull Sale and he goes back to the very productive Lewis Amber cow family. We think this young herdbull 5D has a lot of potential and will be easy to find sale day.

If you're looking for a bull to sire outstanding females here he is. A direct son of IPU Pocahontas 68M and sired by LFE Vegas. Two great cow families, the Pocahontas 68M cow and the LFE Amber cow family. We could write a book on Pocahontas 68M. She is the mother, grandmother and great grandmother of some of the best Simmentals ever raised here at LaBatte Simmentals. We have seven daughters of hers in our herd and several granddaughters. She is the mother of our high selling female in the 2015 Simmsational, a Crosby daughter that sold for \$35,000 to Bar M Simmentals, and two of her granddaughters averaged just under \$19,000 in that same sale and in the 2016 Simmsational a granddaughter was our high seller going to Beechinor Bros. & Red Top Livestock for \$29,000. Her past three sons in our spring bull sale have averaged just over \$18,000. She is the grandmother of IPU Diablo 41Y, a Crosby son that worked so well at Erixon Simmentals. 68M is fifteen years old now and still going strong and still has a perfect udder. She is currently at Bow Valley Genetics, and still flushing successfully. Her son, 6D, is super dark red, very smooth made, nice fronted, structurally correct and is homozygous polled. We think he would sire some outstanding breed leading females.

A really good smooth made son of IPU Redneck 92B, our high selling bull in our 2015 bull sale purchased by Mandan Lake Simmentals, ND. He is mothered by a really good uddered Specialist cow, 67X, who has a son working at Gene Brown's, ND and a female at Oberle Bros. and a beautiful uddered Red Zone two year old that just calved mid January here at LaBette Simmentals. This solid made bull will sire outstanding replacement females and good bulls and steer calves. He's homo polled.

A homo polled Muirhead Broker son out of a really good young Liner 56U daughter that mothered our high selling open heifer in last year's sale, selling to Rainbow River Simmentals, MB. She went straight into Jennalee's transplant program. This low birth weight, smooth made 221Z son should calve very well and add some depth of body to his calves. He's a non diluter being out of two black parents and is homozygous polled.

This is a really soggy, deep sided, thick Vegas son that we don't have a picture of. When Wilf Davis was here in early January it was -25C to -30C, not very nice weather to take pictures. We didn't get as many taken as usual but as Wilf lives in Douglas, MB, it's a long way to Gladmar, SK and we tried our hardest. 55D is off an exceptional Accelerator-Pocahontas 68M daughter that has sons working at Cockburn Red Angus at Briercrest, SK and Diamond K Cattle Co., Maple Creek, SK. She has a Horizon daughter at Erixon Simmentals that was purchased as one of our feature females at Simmsational 2015. 217X also produced one of our favorite cows here at the ranch, 154Z, who is the mother of Lot 8. Lot 6 is a full brother by blood to Lot 1, both sired by Vegas and out of full sisters. He will sire the right kind of calves in kind, type and quality. What a set of steers he would sire!

Sierra riding in the Mutton Busting at Radville Rodeo.

She took 2nd place and made it halfway down the arena.

A calving ease specialist in the making here. This smooth made Sheriff son has an 80lb birth weight. He is out of an excellent first calf red El Tigre daughter that has a beautiful udder. We're sure 59D is homo polled, though we didn't test him, as his grandmother was peaked polled and always had polled calves and of course El Tigre is homo polled. This smooth made Sheriff calf would be a sure bet to use in the heifer pen. Take a look at his EPDs – they don't get much better.

IPU RED ZONE 61D

This is a bull that we have admired from birth. He is sired by the powerful Red Zone bull and out of one of our favorite cows, 154Z, a Red Force daughter going back again to the Pocahontas 68M cow family. His full brother sold to Sonny Berndt from Rugby, ND in last year's sale and he was identical to 61D. Both are dark red, soggy, full of meat and muscle, very loose made and are homo polled. We think this Red Zone son has a lot of potential – great sire, great mother, great bull.

We really like this Redneck son. He's thick, smooth made, has lots of quarter and rib. Again his sire is the \$50,000 red El Tigre son, Redneck, that was our high selling bull in 2015. We bred a few cows to him and are very happy with his progeny as can be seen by this bull. We were down at Mandan Lake Simmental Ranch, the Staigles, in October and were very impressed by the Redneck calves. He's doing quite a job for them. The dam of 71D is a beautifully uddered Liner 56U daughter that raised one of our high selling bulls in last year's sale that sold to the Schweitzers at Decker, MB. 71D is very well balanced, he's stout, has lots of top and muscle and is very stylish. We will have homo test results back by sale day.

This has been one of the favorites all summer. He's so stylish, thick, deep bodied and big ribbed. His mother is one of our best young cows. She's a Horizon and goes back to a really good Accelerator cow that is at Meadow Acres Farms now and is in their flush program. The 21A cow is very easy fleshing, pear shaped, beautifully uddered – just a front pasture cow. Her first calf, a bull, sold in last year's sale to 4 S Farms at Birsay, SK. Investor ranked number 6 out of 68 contemporaries for weaning index with an adjusted weaning weight of 879lbs and an actual weaning weight of 930lbs. Homo polled.

This is a powerful red blaze face El Tigre son out of a super black blaze face Exciter daughter. His mom, 120W, was our second pick of the herd when we sold the big bunch of our cows to Meadow Acres, so we were pretty high on her. This hetero polled non diluter beef machine will add pounds to your calf crop and his daughters will be great replacement females. He's the kind that has made Simmental so popular with the seedstock producer and commercial industry.

BW: 108. 205D: 815. EPDs: 6.7 3.5 74.2 103.1 28.0 8.5 65.1

A cherry dark red, moderate framed, great haired Red Zone son out of a really good Beef Maker cow going back to the 16M Noremac cow family. His mother has sons working at Ray Tutor's, Meyronne, SK, Glen & Melinda Aldentaler's in South Dakota and Nick Storm's, also in South Dakota. We sold a red blaze face Chakota daughter of hers privately to Jean-Francois LeBlond at Armagh, PQ. She was just like 106D, thick, easy doing and fancy. We really like this bull for his kind and type, his thickness and balance. 106D possesses a great set of well balanced EPDs and ranks in the top 5-45% in all traits.

Dale Ehrhardt, night
watchman in calving season

IPU RED EL TIGRE 114D

A feature red, powerful, El Tigre son that we are really high on. He reminds us so much of El Tigre himself when we purchased him from McMillen Ranches, only this guy is in a red package. His mother is a young, good uddered Lotto daughter going back to our old matron black cow family, 304Y. She was our original flush cow and we had many great daughters of hers head our black program. We always said it wouldn't have mattered what she was -- red, fullblood, black, white -- she was just a good cow. We really love this 114D. He's so thick and soggy, has a great haircoat, lots of testicles, big butted, and so loose made just like El Tigre was. This is a bull we plan to draw semen on after the sale and use in our own program. He's a non diluter being off two black parents and homo polled. He has herd bull written all over him.

IPU RED ZONE 149D

This really is one of the good bulls in the sale. We really like him a lot. He is mothered by a really good uddered S-Paw Turbo Charged cow going back to Bodybuilder. We have a really good Code Red first calf heifer in our herd off of 287Z that looks just like mom. She was the spare red heifer for this past Simmsational sale so that's what we think of her. 149D is really a loose made, thick, stout made bull with lots of hair and eye appeal. We will have his polled test back by sale day. He is definitely one of the feature red bulls in the sale this year and we think he has a bright future.

A dark red son of Bartender 392B. He's a bull we purchased along with Oberle Bros. from CRM Simmentals and Barclay Smith. He was the high seller that year at their bull sale. His son, 138D, is really a good bull, so deep and loose made with a good quarter and lots of hair. We believe he'd really sire a group of great feeder calves, the kind the order buyers want, the feedlots like to feed, and they'd have the carcass in them the slaughter plants are looking for. This is really a good bull and has a lot to offer the beef business.

225X raises another stout thick bull again! She's the mother of our high selling bull in last year's sale, a Red Zone son called "The Closer" purchased by Bouchard Livestock and Boundary Ranch. Unfortunately he got an infection in his sheath and never was able to produce semen. We believe a great loss to the Simmental industry, as he was one of the best bulls we had ever produced and he had a lot to offer. 74C's and 157D's mother is a beautifully uddered Revolution cow going back to our Pocahontas 105L cow family. 105L is sixteen years old now and is still going strong. She is at Bow Valley Genetics currently, still producing some embryos for us. 225X is in our flush program also and soon will be getting flushed to Red Zone 16A. She has three daughters in our herd that are awesome and we plan to get many more. 157D is dark red, long and smooth, big butted and stylish. He had an awesome 205 day adjusted weaning weight of 891lbs. He would sire some exceptional replacement heifers and powerful bull and steer calves. Hetero polled.

A dark dark cherry red son of Red Zone. He is very thick made, has lots of top, big testicles, great haircoat and is very stylish, just how you would want your new herdbull to look. He is mothered by one of our favorite cows, an IPU T-Bone 13R daughter out of a the great Full Fleck Anchor "T" Barbi cow. 86U is solid red, has a perfect udder, is very easy doing and attractive. In last year's sale 164D's full brother sold to Blake Storie at Lake Alma, SK for \$13,000. He too was one of my favorites. We think 164D would sire some outstanding bulls, steers and replacement heifers and his Fleck influence would be an added bonus.

We think this bull would be a real calving ease bull. He's so smooth made, long necked, nice headed, has plenty of thickness, good disposition and is sired by the outcross bull, Prime Beef, who is a Beef King son out of a Big Sky cow, so lots of calving ease in that pedigree. His dam is a great uddered, soggy, Horizon first calf heifer out of the 225X cow, the dam of our high selling bull in last year's sale. This calving ease prospect is homo polled by parentage.

Reference Sire

MRL EL TIGRE 52Z

El Tigre is one of greatest herdsires to ever walk our pasture. He has done so much for our program, both males and females. We've never used a black bull that puts muscle, mass and rear quarter in his progeny like he does. His sons are so consistent in type and kind. His daughters are making really nice young cows as we have two and three year olds calving out this year. They have lots of capacity, natural thickness and real good udders. He's homo polled and hetero black so we've been able to put some of his genetics into our red program. In our 2017 sale a lot of our feature bulls are sired by El Tigre, both blacks and reds.

We had the misfortune of losing El Tigre this summer with a back injury. We have a limited amount of semen left on him, so we will continue his legacy through A.I. Thanks for the great job El Tigre!

IPU EL TIGRE 21D

This El Tigre son comes out of the great Pashmenia 403P cow family, a cow that was one of the best producing black cows we ever owned. She was a black baldy and part Fleckvieh. Now her daughter, Pashmenia 245Z, is taking over as she is a producing machine. Her first offspring was a full sister to 21D and she sold through this very sale as our high selling open heifer to Crossroad Farms for \$18,000. Her second calf sold again in our bull sale last year, a black Horizon daughter, to Bert's NR Simmentals, Haywood, MB for \$12,000 and now she has this outstanding El Tigre son in this year's sale. He's a powerful bull with an actual weaning weight of 1010lbs, a moderate 96lb birth weight, is full of meat and muscle, has tons of rib, a great temperament, huge testicles and is hetero black and homo polled. He'll be easy to find sale day.

Again another El Tigre son going back to the Pashmenia 403P cow family. 57D's dam is a direct daughter of 403P herself. In last year's heifer portion of the bull sale we sold a black baldy Cobra daughter to young Garren Skeels of Anchor D Simmentals. Garren is an outstanding young man and hopefully the Pashmenia daughter will produce many good progeny for him as that cow family has produced for us. 57D is really stout made, has lots of hair, is long and big butted, just a really good bull. I can only imagine the set of steers this bull would produce, he will add pounds to the calf crop. He has an adjusted 205 day weight of 887lbs and ranked 4th out of his 68 contemporaries. He's hetero black and homo polled.

IPU EL TIGRE 112D

Well here he is, the powerhouse El Tigre son, 112D. He's been an absolute standout since he was a young calf. He is mothered by a black blaze face TNT Tanker female that is a tank, good uddered, big volumed and is out of a black blaze face half Fleck cow. She has raised our #1 and #2 adjusted weaning weight bulls the past two years. That's a producer! In last year's sale her El Tigre son sold for \$14,500 to Pearl Valley Simmentals of Ross, ND. He was one of my personal favorite bulls. His full brother this year, 112D, was our heaviest weaning bull at 1020lbs and had an adjusted 205 day weight of 954lbs, the #1 ranked bull. He's as thick as they come, huge big quarter, big topped, long, great haircoat, lots of testicle and has a great disposition. We plan on using this bull in our own program as we will draw some in herd semen for our own use. He's homo polled and hetero black. He's definitely a powerful feature bull.

IPU BRIGADIER 33D

A moderate framed, super stout Captain Black son out of Maple Lake Miss Me 2002. This beautiful 786T daughter is the start of a new cow family here at LaBatte Simmentals. She's what we think is the ultimate type cow, moderate, big bodied, angular, feminine, super fronted and good uddered. She's the kind that when you're on a pasture tour you ask "Who's that cow?" And she's not only good to look at, she's a producer too. Her first calf, a High Voltage daughter, sold in our 2015 sale as our second high selling heifer at \$15,250 to Rust Mountain View in ND. She had a baldy bull in last year's sale selling to Todd Knupp at Weyburn, SK and this year has this outstanding Captain Black son in the sale. We feel this is one of the real feature bulls in the sale. He's moderate, thick, thick, with so much hip in him, lots of middle, loose made, great haired and attractive. He's been one of the favorites since he was a baby. He's homo polled and homo black by parentage.

If you're looking for a bull that would fix udders on your cows look no further -- Captain Black-Lotto-56U. In our program the Liner 56U and Lotto udders are second to none and with Captain Black's mom's udder this bull should really correct udders. They'd have nice small teats, level udders and milk very well. This deep bodied, good haired Captain Black son had an actual weaning weight of 950lbs and an adjusted 205 day weight of 971lbs where he indexed 9th out of 68 contemporaries. He DNA tested homo polled and homo black.

IPU SODA POP 49D

This homo polled and homo black Soda Pop son is a bull we really like. He's mothered by an Upgrade daughter we purchased at the National Trust sale in Brandon, MB as a calf. We always really liked the Carli 14N cow family at Mar Mac and finally got a chance to buy a granddaughter of hers as they don't offer many progeny off that cow family. 55A has turned out just as we expected. She has a great udder, is very feminine, fertile and deep bodied. In last year's sale her first calf, a Cobra son, sold to Brian & Paige Uran of Ross, ND for \$13,000. He also was an excellent bull. You evaluate this bull sale day as I think he has a lot of potential being from a really good young cow. He's homo-homo, thick butted, deep bodied and has a good haircoat. He's a herdbull!

Congratulations to our good friends and bull customer, the McKim family being named the 2016 Commercial Breeder of the Year by the Saskatchewan Simmental Association.

Brodyn & Jory working on their heifers at Weyburn 4-H district show.

A high performing Muirheads Broker son that had an actual weaning weight of 985lbs, an adjusted 205 day weight of 928lbs and that ranked him 2nd among his contemporaries. He's mothered by an excellent solid black Bridgestone daughter so he would have a touch of Fleck in him. 80D's a powerful, high performing bull with lots of middle, top and thickness. He too would really sire a set of powerful calves whether heifers, bulls or steers. I can only imagine the set of calves this guy would sire off a herd of Angus cattle.

A real moderate, great haired Soda Pop bull out of a young Stubby cow we purchased from Bert's NR as a calf. Her first calf, a Kuntz Sheriff 8A son, sold in last year's sale to Ron & Lois Crosby of Vanderhoof, BC. 102D's sire is the Poker Face son we purchased from Outlaw Cattle Co. as their high seller. His five full sisters were one of the highlights at the 2014 Friday Night Lights sale, averaging around \$15,000. Soda Pop himself has great calving ease and is homo polled and black. 102D is solid black with a little white on his nose (his mother was a blaze face), he's moderate, thick, has a great haircoat, has lots of middle and possesses a nice 88lb birth weight.

This February, blaze face Muirheads Broker son has been one of our favorites since spring. He's always had lots of top and butt in him. He has a great haircoat, is deep ribbed, has loads of capacity and style to burn. What a set of replacement heifers and bulls or steers he would sire. The baldy cattle are becoming very popular. The order buyers and feedlot operators like these cattle with a little chrome on them, knowing there is probably some Simmental influence in them to give them gain-ability and the carcass value they're looking for. And the baldy replacement females definitely bring a premium.

Finishing up our black section we have an own son of Hoc Broker out of a really moderate, super uddered Ridgeline cow we bought from Bonchuk Farms in their 2015 female production sale. 187D is moderate framed, has a really nice haircoat, is deep sided and has a little chrome on his face. Again he should sire those calves that will be in demand by the order buyers and feedlots.

Thank you to our 2016 Buyers

IPU Ms. Laredo 107Y brings her third bull to our annual sale. Past bulls have sold to Dwayne, Bonnie & Brandon Brown of Strasbourg, SK and a really good Radium son to James Creek Simmentals, ND and Jeff Sorenson, SD. 107Y goes back to the great Dora Lee Franchesca cow family who was the mother of IPU Bronson 19K, the bull that did so much for Virginia Ranches. She was also the mother of IPU 4G Franchesca 98N that excelled for the group in Quebec -BMS, Boisvert and Sibelle. She is the great grandmother of 65D. This bull would sire some hairy, thick, deep sided calves that would be great feedlot calves. Non diluter.

This is a really smooth made Standout son off a really nice uddered, moderate, feminine Champs Wallace female. We sold a full sister to this bull in our 2016 Simmsational sale in December to Circle 7 Ranch in Shaunavon, SK. We really like this bull for his depth, muscle, color and structure. He too, as all our fullblood bulls are, is a non diluter, which means you can breed black cows to him and you'll either get black or red calves – no grays. On a set of Black Angus cows you would probably get mostly black calves, some with blaze faces or brockle.

Esposito 150D is a full transplant brother to 126D. We also have a full sister in our keeper pen. In last year's bull sale we sold a Sibelle Dirty Harry son of 402T to Bangsund Farms, Weyburn, SK in which he was our high selling fullblood. We've been flushing this gorgeous Maltese cow for the last year and a half along with Anchor D. We have embryos in the tank from PRL Houston, Stuey, French Attack and I talked Danny into doing her black, as she is a non diluter. We flushed her Springcreek Liner 56U and got 16 eggs. Pretty excited about this mating as what a foundation cow this would be in creating a new cow family in the black and red Simmental world. 150D is very similar in type, color and performance to his brother. There's a lot of opportunity in these two full brothers, Non diluter.

All of us at Meadow Acres are happy to welcome you to this year's bull sale! This is our fourth offering to the sale and we would like to thank all the buyers and bidders from our past sales for your support and commitment to making this sale a priority on your search for high quality genetics. Without you none of this would be possible!

We are honoured to be a part of this bull sale that Barry has built over the last 37 years to be a trusted source for high quality Simmental genetics. Our operations align well to bring you genetics that are from the same base to promote consistency and predictability amongst all the bulls in the offering. We are both family farm operations that have a huge passion for the cattle business and agriculture in general.

We continue to bring to you genetics that include a mix of fresh up and coming with proven ones as well. This year we are very pleased to offer some new bulls that we raised here at Meadow Acres and sold through this very sale. We want to thank our customers that worked with us to utilize these genetics in our own herd and we are excited to showcase what these bulls have gone on to produce! We continue to invest heavily in our herd sires to bring to you the best possible genetics available in the Simmental Industry.

Our bulls are all semen tested and guaranteed, as well as colour and polled tested prior to sale day. The bulls are on a full herd health program that starts at birth and continues up to sale time. We have had great success with our TMR ration that these bulls are on. It is high roughage based to promote soundness and longevity. It is always the true test to your nutrition program when following up with customers and hearing that they are extremely satisfied with how the bulls held their condition and are not melting away. We will, as always, offer delivery in most cases right to your yard. For customers in the United States we will complete all health paperwork required for export and make arrangements accordingly on delivery.

We welcome you at any time to come to the farm and go through the bulls at home in their own everyday environment and have the ability to see the mothers. It's always a challenge to get away from home, we understand that, so we are also happy to talk with you and determine the bulls that would fit your specific needs. We also have videos available on all sale bulls on our website www.meadowacresfarms.com and are excited to once again have our sale being broadcast live on www.dlms.ca.

We invite you to join us in Moose Jaw Thursday evening for some hospitality at the Heritage Inn as well as lunch on Friday prior to sale time. We look forward to catching up with you in Moose Jaw on March 3rd!

MAF MR 266C

Homo Polled/Hetero Black. Here is a really unique opportunity to capitalize on some of the most elite genetics in the Simmental breed! 266C is a fall born bull so he offers a bit more maturity, size and ability to cover more cows. He is an extremely well put together individual. He is long bodied, strong topped and deep made. 266C has had that herd bull presence about him, since he was a young calf. He is phenotypically hard to fault and has a pedigree that is as well. He is sired by the legendary SVS Captain Morgan and his dam is a Black Joker daughter with Fleck influence. 403P has been an outstanding producer throughout her lifetime and still going strong. She is a cow we are very fortunate to have and have utilized her as a cornerstone female in progressing our herd into the future. We have four heifers from this flush as well as the next bull in the offering. This bull has the ability to be a great building block in any program, just like both his sire and dam.

MAF MR 14D

Homo Polled/Hetero Black. The first of the sons sired by the \$170,000 LFE The Riddler 323B in the offering! 14D is a very complete individual. He is very long bodied, thick, deep and has "The Look". He is strong topped and very sound in his design. 76T is a very attractive Red Label daughter who has been an excellent producer for us. She has sold numerous females and bulls into fellow breeder and commercial herds alike and we have retained four daughters that are in production. 14D has a moderate birth weight and a well-balanced EPD profile. This bull has a lot of potential and will certainly be one of the elite Riddler sons to sell this spring.

53**MAF MR 124D**

Tests pending. This bull was one that has always caught people's attention even from a very young age. He is thick, wide, deep and soggy, and a bull that is very clean in his lines and attractive. His EPD profile is above breed averages in all categories and his dam is a Red Tanker daughter out of the X-T Raven cow, who is the dam of a number of females working in our herd. This bull is a bit of a different twist on a lot of today's black pedigrees; no 680S or Broker here. I missed sending the hair in for polled and colour testing on this guy but it will be completed by sale time.

Homo Polled/Hetero Black. Our lead off "Mafia" bull is definitely the real deal. He is thick, wide, deep and soft made. A bull that moves out well for his amount of muscle and is long bodied and strong topped. This bull has had a real herd bull look to him since he was a young calf. His dam is an extremely hard working Shear Force daughter that raised our high selling bull last year, MAF Lampman 1C who sold to Ferme LaBlond in Quebec. She is a moderate framed cow with a very good udder and she does a great job on every calf. The combination of power and growth from "Mafia" and highly maternal attributes of Shear Force come together for an excellent set of EPDs across the board and a bull that has so much to offer any operation.

Polled/Homo Black. We start the Cobra section with this powerful son. Cobra has been a mainstay for us in the heifer pen and he has really just clicked for us in our herd. The calves have a lot of growth to them and are highly marketable. 93D follows this type very well, he was born to a first calving El Tigre daughter that did a very good job raising him. We have many members of the Lady cow family here and they are highly productive. This Cobra son reminds me a lot of his sire, he is thick, deep and very sound. He is strong topped and has a bit of extra extension through his front end that gives him a real neat look. He has a great weaning weight EPD and he should be a bull that calves well and produces calves that really have grow to them.

MAF MR 101D

Homo Polled/Hetero Black. Here is a really neat made Vision son that was purchased in dam as one of the high selling bred heifers of Ashworth's. He is moderate framed and full of meat and guts! He is as deep a bodied bull as you will find, is very smooth made and phenotypically sound with lots of "pop" to his hind quarter. Another bull that has always had that herd bull look and presence to him. His dam is a black Red Mountain with a perfect udder and it is obvious the great job she did on her first calf! 101D has a really nice set of EPDs, maintaining above average in both calving and growth areas. A bull that deserves serious consideration!

 TRIPLE C SHINING POWER

BW: 102. 205D: 678. EPDs: 2.8 3.5 51.8 77.4 28.3 6.2 54.2

Homo Polled/Hetero Black. Lotto continues to be utilized as one of our two main walking herd bulls. His progeny have been highly marketable and widely recognized for growth and maternal strengths. Although Lotto runs mainly clean-up for us now, we do not dispute his value. With these sons we have on offer, it is easy to see why! 254D is thick, deep and soggy made. He is long bodied, strong topped and moves out with ease. His dam is a black, Red Quorum daughter that is good uddered and a really nice made individual. We sold a maternal sister to 254D in December to Don Krueger and she has calved out with a perfect udder and is doing a great job on her first calf.

Homo Polled/Hetero Black. 217D & 230D are results of embryos we purchased from Come As U R. 934W was a high selling female from the Blacksand Dispersal and one that we were very high on and pleased that we were able to purchase these embryos. 217D has really nice eye catching chrome, is soggy made and a bull that has huge weaning and yearling weights. He is a bull that should bring performance and style to your calf crop!

Polled/Hetero Black. The second of the full brother embryo bulls; 230D is solid black. Another performance type bull, he is big middled and very well balanced in his design. He is thick and very nicely put together. This guy, like his brother, has huge growth numbers and will add power and performance to his progeny.

Polled. A ¾ brother to Lot 96, this bull is hairy, thick and extremely strong topped. One of the biggest benefits that we have found from Horizon is the consistency he has brought to his offspring. They are all stamped with the same soggy, thick, hairy look to them. You will see this when you go through the bulls as once you see one Horizon you will easily identify the others. The Revolution daughters are a very productive group, nice uddered and big bodied cows.

Scurred. 220D is an embryo bull out of the 403P cow, which makes him a maternal brother to Lots 46 & 47. We have some full sisters to this guy in the replacement pen and they are extremely impressive! A bull that should be seriously considered if you are looking to keep replacement females. His dam is our foundation female that has never missed for us and is a beautiful cow that is still going strong and bred again for the fall of this year after flushing her for the last year. We sold a black full sister to this guy to Leewood Ranch and have another that has a perfect udder.

LaBette Simmental will be consigning 16 open replacement heifers in this year's sale, including 8 black and 8 red heifers. This is a really nice even group of heifers and they are sired by some of the breeds top sires – El Tigre, Soda Pop, Vegas, Dillinger, Red Zone and Prime Beef. We didn't get a lot of pictures of the heifers this year because of the extreme cold weather when Wilf was here taking pictures. If you have any questions about these heifers before the sale, be sure to give us a call and we will be glad to go over them with you. Or, better yet, come and have a look at the farm before the sale. We would be glad to show you them and their brothers in the bull pen.

IPU EL TIGRESS 87D

A feature El Tigre heifer of Wade's. This is really an outstanding heifer sired by the great El Tigre and mothered by a young, productive Liner 56U daughter. One thing for sure, she will have an excellent udder as 159A's udder is super and the grandmother, CCC Tamales 1U, has the ultimate udder, maybe as close to perfect as you can get. And then add El Tigre in there and it doesn't get any better. The 87D heifer is an exceptional heifer with her depth of body, muscle, broodiness and has mother cow written all over her.

This is a really good, solid black Apollo heifer out of a black Horizon daughter we purchased at the 2014 Checker sale from Paul Maxwell, ON. She did a really good job on her first calf who is sired by TSZ Apollo 508Y, a Hooks Shear Force son. We saw pictures of Apollo and heard a lot of good things about his mother, a tanky Black Joker cow, so we talked Travis Herter into selling us a few straws. He's in the top 3% of the breed for calving ease so we thought we'd try something a little different on a few heifers. 14D is very feminine, moderate framed, has lots of volume, a great haircoat and we think will make a great young cow.

A really nice, moderate Muirheads Broker daughter that comes in a red package. Her mother is a really nice, medium framed Horizon daughter going back to a really good Accelerator cow, 235W. This heifer is very broody, has lots of natural thickness and is very attractive. We think these Broker 221Z females are going to be pretty special young cows.

Again, another moderate, easy doing heifer sired by IPU Red Western 49X, the bull that has worked so well for McMillen Ranching and Ashworth Simmentals. 47D is out of a first calf Bootlegger daughter going back to a really good Touchdown cow, 69U, that now resides at Outlaw Cattle Co. and Hay Valley Ranches in Alberta. We breed a handful of heifers every year to Red Western, he calves so well and leaves some very desirable progeny like 47D, easy doing, moderate and broody.

IPU MS. GERALDINE 9D

Geraldine has been a standout heifer right from spring. She is sired by the \$32,000 IPU Dillinger 80B, who was a Bootlegger son out of the Pocahontas 2Y cow. He sold to Kinn Simmentals of Turtle Lake, ND in our 2015 bull sale. We collected a little semen off him and bred a handful of heifers to him and, as expected, he really calved well. This heifer is really good, pear shaped, thick and made nice through her head and neck and is really broody. We think she is definitely a sale feature.

IPU MS. BARBI 160D

We think a lot of this young Prime Beef heifer. She's out of a first calf Horizon daughter going back to the Barbi cow family. Her sire, Prime Beef, is an A.I. bull we used a bit of at the end of the 2015 breeding season on heifers. The few calves we got we were quite pleased with and he calved very well. This Barbi heifer is very good, she's really broody, has a great haircoat, is thick but still feminine and has a great disposition. She is one of the feature heifers in our offering.

A deep made Vegas daughter out of the Red Quorum cow, 603S, who herself has produced nine straight calves for us, never missing a year. She is also the mother of IPU Crosby 164Y, the bull Wilcox Simmentals bought from us in our 2012 bull sale and he went on to do a great job for them and later Riverbank Simmentals bought into him. A maternal sister to 101D just recently sold in the 2016 Simmsational sale to Forden Simmentals of Punnicich, SK. We think this Vegas daughter will be the kind that will put some performance into her progeny and can produce herd bulls.

A really good Red Zone heifer out of a second calving, good uddered Marksman daughter. These Red Zone cattle are some of the best we've ever produced. In last year's bull sale they were one of the strongest group of bulls in the country and sold very well and this past year at Simmsational where we sold six bred heifers sired by him that were very much in demand, topping out at \$29,000. He's a bull that sires bulls and heifers that excel. 116D is moderate framed, really thick made, has lots of top and is pear shaped showing her broodiness.

As we said earlier, when Wilf was here taking pictures it was really cold and miserable so we didn't get as many pictures taken as we would have liked to, especially of these red heifers. The mother of Ms. Vegas 123D raised a maternal sister that sold to CD Land & Cattle, Doug Domolewski, AB in last year's sale and the year before a son sold to Clifford Pukas at Wynyard, SK. This Vegas female is cherry dark red, very feminine made and will be a producer.

Finishing off the heifer division of the sale with a middle of February red baldy El Tigre heifer. Her mother is a good High Tide cow we purchased out of the Black Diamond dispersal as one of the high sellers. We have two of her daughters in our herd including a full sister to 169D. This heifer is solid dark red with only a white blaze on her head. She could raise some of the baldy bulls that are so in demand today.

Cows up at the Ranch going out to do some grazing -- Angus cows bred Simmental
