FOREWORD

Welcome to LaBette Simmentals 38th Annual Spring Bull & Female Sale on Friday, March 2nd, 2018 at Johnstone Auction Mart, 4 miles west of Moose Jaw, SK on #1 highway. Can't believe it's been twelve months already that we were writing footnotes for the catalogue. How time does fly!

Ourselves and Meadow Acres would really like to thank all the bidders and buyers from our past sales for the continued support and effort you make each year to attend our sale. It is very much appreciated. Again in the fall of 2017 we saw an upward swing of cattle prices. Customer's steers were bringing \$1200-\$1500 per head and the Simmental heifers were in high demand. In the commercial bred heifer sales Simmental and Simmental cross heifers were definitely topping the sales and bringing big premiums for their owners. The Simmental breed is in high demand with the commercial industry right now. I think as a breed we have listened to our customers, made changes, and are raising the kind of cattle that the commercial industry is looking for. The breed offers high maternal traits, milk and muscle, superior performance and carcass value.

Our bull sale this year, along with Meadow Acres Farms, will consist of over 90 bulls in total. They are polled, thick, meaty, red and black bulls and a handful of red goggle eyed fullblood Fleckvieh influenced bulls, the kind that will make those baldies on your Black and Red Angus cows. The bulls are sired by some of the industry's leading sires such as IPU Red Deputy, Spark Plug, Westcott, Royal Red, Priority, El Tigre, Liner 56U and French Attack in the fullbloods. We are always looking for genetics that will produce the right kind of bulls for our seedstock producers and commercial customers. Bulls that have fleshing ability, lots of middle and top, high maternal traits, good temperaments and are structurally sound on their feet and legs.

We will also be offering 16 top open replacement heifers, red and black, eight of each. I believe this is the best set of open purebred replacement heifers we've ever offered. Many of them are baldies. In the black division many of the heifers are sired by our new herd bull, MRK Priority 3C, a solid black, blaze faced Vision son that we are really excited about. He's a massive, deep bodied, thick made bull with all the his EPDs ranking in the top 50% of the breed. We're really excited to see his females in production next year. The reds are highlighted by daughters of the red baldy bull Spark Plug, an outcross bull that is going to have a big influence in our breeding program.

If you are unable to attend the sale, give myself or Meadow Acres Farms or any of the sale staff a call to have the sale offering evaluated for you. We can be reached the day prior and sale day on our cell phones: Barry 306 815-7900 or Dustin 306 487-7510 or Johnstone Auction Mart at 306 693-4715. If you have questions earlier give us a call on our cells or our home numbers. The sale will also be broadcast live on dlms.ca, so contact Mark Shologan for more information and help getting approved for bidding. His phone number is 780 699-5082. We welcome your visit to our farms anytime to see the bulls and heifers first hand.

Come join us Thursday night at the Heritage Inn in our hospitality room for some socializing and laughs. We look forward to seeing you on Friday, March 2nd at Johnstone Auction Mart, Moose Jaw, SK. Join us for a complimentary dinner prior to the sale and also after the sale for some socializing, refreshments and snacks. Best of luck in 2018 and hope to see you sale day.

Barry

P.S. Grandkids are growing like weeds. Our oldest, Brodyn, just turned 14 in November and is almost six foot tall already. Emry and Jenna, our oldest granddaughters, are starting to play basketball already at the Gladmar High School. The boys are all still playing hockey on three different teams, all in beef 4-H and grain 4-H. The girls are busy with karate and all three travel to Weyburn to take gymnastics. Great to see them involved in sports and full of energy. They make us very proud grandparents.

Health

All bulls will be scrotal measured and palpated. Bulls over 12 months of age at time of testing will be semen tested.
Bulls under 12 months of age at time of testing will be semen tested prior to delivery. Weights will be posted sale day. All bulls and heifers were given Cattlemaster 4, Somnustar PH and Fortress 7 in June and boosted with same in September. All were treated with Ivomec Pour-on in September and January.

**"Sight Unseen"
Purchase Program**

If you are unable to attend the sale but are interested in our bulls give Barry or Dustin a call and they will personally go over the bulls and your program with you. They will recommend which bulls they think would meet your satisfaction and refer you to one of their sale staff.

In-Herd Semen

LaBatte Simmentals & Meadow Acres Simmentals reserve the right to collect semen on any bull sold through this sale. The semen collection will be at the seller's expense and the buyer's convenience. Any semen collected will be for in herd use only.

Delivery

At the buyer's option and risk, LaBatte Simmentals and Meadow Acres Simmentals will take purchaser's bulls home, feed them under their management and deliver them FREE anywhere in the prairie provinces to your nearest central location. We will do our utmost to deliver them right to your yard. Delivery will take place between April and the middle of May. For bull buyers outside the prairie provinces, bulls will be delivered at a reasonable charge. The bulls are the property of the buyer as soon as they are sold. Therefore, buyers must insure their animals for the time they are at LaBatte and Meadow Acres Farms. The heifers will be delivered as soon as possible after the sale.

If you are unable to attend our sale, please join us by viewing the sale live online at www.dlms.ca. For more information and help getting approved for bidding, contact **Mark Shologan 780 699-5082**.

Guarantee

All animals will carry the standard breeding guarantee as specified by the Canadian Simmental Association. At no time shall the seller's liability exceed the purchase price of the animal.

Video

Video of sale bulls will be available. For LaBatte Simmentals go to www.labattesimmentals.com and for Meadow Acres Simmentals go to www.meadowacressimmentals.com or www.dlms.ca to view.

Terms & Conditions

The sale will be conducted under the standard Johnstone Auction Mart Ltd. Terms & Conditions.

Accidents

Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

Homo Polled. We are starting off the 2018 sale with an outstanding calving ease prospect in Lot 1. This Sheriff son has been good right from day one. Wilf Davis purchased his dam for us from Neil Carson and family at the 2016 Harvest Hoedown sale where she was one of the high sellers. 8E's mother is dark cherry red and very good uddered and has done a great job in raising this special bull. Justice started with a small birth weight of 76lbs, is moderate framed, thick and soggy, has a great hair coat and disposition. We think this young herdbull has a lot of potential as a calving ease specialist, but also as a herdbull with his muscle, capacity and eye appeal.

Homo Polled. A cherry red Dillinger 80B son out of a first calving Sheriff daughter going back to the great Pocahontas 105L cow family. This guy is as long as a freight train, dark dark red, good muscled, very smooth made, homo polled and has a little different pedigree on top for the industry. His dam is perfectly uddered, great pedigreed and going to be a standout cow in the future in our herd. 14E is a sure calving ease bull with his small birth weight, double calving ease pedigree with Dillinger and Sheriff, his smoothness and length. He's in the top 1% of the breed for calving ease EPD and top 4% for birth weight and top 3% for API. We think this Dillinger son has a great future ahead of him.

IPU LIEUTENANT 24E

Homo Polled and Diluter Free. This bull's name should be Standout because that's what he's been since the day he was born. He looked great as a calf, great at six months and continued on through weaning and still is a standout today. His mother is a great uddered Horizon daughter that is one of our favorite cows. Of the "A" red cows our two favorites have been 21A, the mother of Lieutenant, and 81A, the mother of Red Deputy. 24E himself has an excellent body type, long, big rear quarter, wide topped, loose hided, has great depth and spring of rib, hair and a great disposition. He is a replica of his sire, IPU Red Deputy 25C, but may be just a little more powerful. We're really happy with our Red Deputy calves. We mostly had heifer calves last spring and they look really good too as you will see by the outstanding Red Deputy daughter 111E (lot 108) that sells in our heifer section of the sale. We believe Lieutenant is one of the best all around red bulls we've ever sold.

Homo Polled. A powerful homo polled Westcott son out of a beautiful super uddered Liner 56U cow. These 56U cows are so much like the Red Chief cows, as they can produce bull calves that are powerful and loaded with performance. In last year's sale 202Y's Vegas son sold to Rocking H Farms, Dan Heather at Biggar, SK and her Red Zone son sold in the 2016 sale to Frank & Kim Arnal at Eastend, SK. Westcott 30E was the #1 index bull for weaning weight in his contemporary group. He should sire a group of calves that are high in performance and quality.

Homo Polled. A really smooth made, homo polled son of Red Deputy out of a really good Red Zone first calving heifer of Lynlee's. Jory used 51E's mother as his first 4-H heifer project. This guy is very smooth made and long, with big testicles and lots of top and quarter. With his 82lb birth weight and his smoothness through his shoulders and neck he is a real candidate for the heifer pen. This stylish Red Deputy son will have lots of friends sale day.

This Muirheads Broker son has a little story behind him. This calf was an eye catcher from a young age and one of the favorites when he was a baby. When his Marksman dam came into heat the cows rode her hard and she broke her back and had to be destroyed. Very unfortunate as she was a really good cow. We put 87E on a Holstein cow that already had two other twin calves on her. So that cow raised three calves, one being 87E. He did very well as he was a really good calf and still is. He's dark red, really smooth made and has a lot of potential.

 Homo Polled. This dark red Westcott bull comes out of an outstanding Gunner cow going back to the old matron Noremac 16M. We flushed 89W successfully this summer and will be putting in some of those embryos this spring. A maternal sister to 95E, a beautiful Red Zone daughter, sold in the 2016 Simmsational sale to Quinn Wilson for \$25,000. We think one of the best heifers we ever sold. In our 2014 bull sale we sold an Horizon son of 89W to Craig Bendickson of Gladmar that I thought was the buy of the sale. Craig has been extremely happy with him and said you can pick his calves out as they are really good. We think this bull should sire some outstanding calves. His daughters should be kept for replacement heifers as his dam and granddam are some of the best.

This is a really tanky Westcott son that has a lot of rib shape, capacity, muscle and top. He has a great hair coat and is very stylish. He's one that a lot of people ask about. In our 2016 bull sale Frischholz Farms from Minton bought a good Red Zone son of 101E's dam 84Z who is a blaze faced, good uddered Hot Iron daughter. With 101E's capacity, big butt and style we think he's the kind that's going to sire those soggy steer calves and great replacement females that are so much in demand today. We are still waiting for his homo polled test results but will have them by sale day.

A dark red, flashy son of IPU Red Zone 16A out of a beautiful Red Ribeye 1134L daughter that is getting up in years but her udder is still perfect. She's just had her 13th calf on the farm on January 19th. Never missed a year. That's fertility! She has sons from past sales working in some of the really good commercial operations of RBD Ranch, SK, Frischholz Farms, SK and Berndt Ranch, ND. This Red Zone son would raise a great set of replacement females that would last and produce.

A super soggy Spark Plug bull out of one of our favorite cows. His Specialist dam is a big time cow. She's dark red, good uddered, deep, deep and very broody. In last year's sale her son out of Bartender was one of our high sellers going to the great commercial operation Diamond K Cattle Co. and in 2015 her good son sold to O'Hara Farms in Ceylon, SK. This bull is just like his mother, soggy, loose made, great hair coat and easy fleshing. Would I like to feed a pen full of steers sired by this awesome Spark Plug son. He's the type of bull we're trying to produce for our good commercial customers, the money making kind.

Another high performing Spark Plug bull with a nice blaze face. Spark Plug was the high selling bull that ourselves and Circle 7 Ranch & Sunrise Simmentals purchased for \$95,000 out of the Springcreek bull sale in 2016. He was stout, sound, thick and had a real presence about him. Also an outcross pedigree sired by the polled full Fleckvieh bull Anchor D Viper and out of a really good, moderate framed Crosby female. He was homo polled and half Fleckvieh. We're happy with his offspring giving us some baldy bulls and heifers that are good as you will see throughout the sale in the red division, black division and the heifer calves.

Homo Polled. A red Springcreek Liner 56U son out of a tremendous T-Bone X Barbi daughter 86U. We bought this T-Bone daughter from Bob Anderson at Cremona, AB as a heifer calf and she has been one of our favorites. She's produced outstanding females and this will be her third bull to go through the bull sale. Her past two bulls have sold to Storie Farms, Lake Alma, SK and Blackwell Bros at Assiniboia, SK. 144E has just a little star on his head, is smooth made and correct. I would be hoping for a large group of heifer calves to keep for replacements off this bull. With the Barbi cow in the pedigree and the great females 56U makes, it would be quite a replacement pen.

IPU 2Y SPECTATOR 160E

POLLED PUREBRED MALE

PENDING IPU 160E 09 February 2017

Both Homo Polled. Truly a sale feature selling these two embryo transplant full brothers by Springcreek Spark Plug and our #1 donor cow IPU 52N Ms Pocahontas 2Y, one of the most awesome cows we have ever owned in 47 years of breeding Simmental. We could write a book about her but I'll try not to. She's a Red Liner 56U daughter out of the great Pocahontas 52N cow that is a full sister to Pocahontas 68M. When we sold a great number of cows to Meadow Acres Farms we had first pick and it was Pocahontas 2Y. She's a beautiful red, moderate female with lots of capacity, middle, an excellent udder and just a true brood cow. At the recent Agribition 50-50 sale the 2Y embryos topped the embryo lots, as we sold 5 Captain Scream X Pocahontas 2Y embryos for \$3450 each to Robb Farms at Maidstone. These were the only embryos ever offered for sale off her. There's a great opportunity in these two bulls with their outcross pedigree, being homo polled, their outstanding EPD profile and their being top quality themselves and out of one of the elite donor cows in the breed. We have sold four sons of Pocahontas 2Y

through this very sale. The Simulator bull to Maxwell Simmentals and Clifford Land & Cattle, the \$32,000 Dillinger bull to Kinn Simmentals in ND, who we use in our own program, the \$20,000 El Tigre son that's doing such a great job for Jean-Francois LeBlond in Quebec and her son from last year, an exceptional Captain Black son that sold to Solberg Livestock, MT. And now these two great Spark Plug bulls, 160E and 166E. They were born a day apart and weighed 94lbs and 98lbs at birth. The 160E bull has a beautiful blaze down his forehead, is long, smooth, thick and correct and has an abundance of style. The 166E bull is solid colored, full of meat and muscle and is great haired and they both have great dispositions.

The only red El Tigre we have in the sale this year and he is a good one. His dam, the Red Knight 172R cow, is sending her fifth bull to the sale. Two full brothers to 178E sold to Sheldon Virotek, AB and Hanford Simmentals, Snowflake, MB. A really good Horizon son sold to RBD Ranch at Milestone, SK and in the 2011 sale a 680S son sold to Rendezvous Farms at Ste Rose, MB where he went on to produce many bulls that went through their bull sales. El Tigre made a big impact in our breeding program with his outstanding, thick, meaty sons going through the bull sale and now his daughters producing that are great uddered and easy fleshing. This young El Tigre son, 178E, should be one to look at sale day.

Fullblood Fleckvieh. Non-Diluter. Again this bull is off a cow we really like; great uddered, moderate and dark red. She produced our second high selling Fullblood in last year's sale, a Standout son, selling for \$13,000 to Kelly Shaver at Bengough, SK, a good commercial operation that uses some fullblood Simmental bulls on their Black Angus cows to produce some baldies and add performance. The sire of 62E, Crossroad Subaru, was the high selling fullblood out of Crossroad's 2016 sale. We took a crack at buying him but came up a little short. He was thick, deep and well muscled. We were able to obtain some semen on him and have been pleased with the calves. Lots of performance.

Homo Polled, Homo Black. Something a little different here. We call him Panda Bear. He is colored like a Hereford but black, not red, and he is "homo" black. We purchased his mother from Czech-Mate Livestock as the high selling black bred heifer out of the Western Harvest sale in December 2016. She is a really good young cow. She was bred to Ultra Mr Combustible, a black baldy bull. When 10E was born unassisted we were a little surprised with his color. But he grew into quite a bull. He started off at 88lbs and had an actual weaning weight of 980lbs on September 5th. Not bad for a 2 year old dam. This guy would sire some awesome, flashy, high performing steers and sharp replacement heifers. He would really work on a set of black cows. He's homo polled, homo black and very interesting.

Homo Polled. A big time black Westcott bull! This soggy made, deep bodied, thick made Westcott son has eye appeal, correctness, a great pedigree and performance. He weaned off his Lotto mom at a whopping 990lbs and was #1 adjusted weaning weight bull in his contemporary group. His dam is a great uddered Lotto cow off a beautiful 56U dam. Her last year's bull calf sold in our 2017 bull sale to Bruce Barber, Biggar, SK and the year before that her Poker Face son sold to Trevor King, Wainwright, AB. With this guy's pedigree – Westcott, Lotto and Springcreek Liner 56U – we think he will be an outstanding breeding bull.

IPU BLACK SUMMIT 29E

Homo Polled, Homo Black. A feature black powerful bull that is maybe as good as we've ever raised in our black program. This bull has been a standout since day one. He is mothered by an exceptional Liner 56U daughter that knows how to raise the good ones. Her first calf sold in our 2016 sale in the heifer division, a three-quarter sister to Black Summit, for \$19,000 to Rainbow River Simmentals, Jennilee & Dustin Stewart. She went straight into their flush program. Black Summit is thick, deep, soggy, has a great disposition, big testicles and a super hair coat. Black Summit weaned off his mother on September 5th at 1020lbs, that's performance! You really need to get in behind this bull to appreciate his stoutness. He's a bull we plan on using in our own program as we think they don't get much better than him. He's homo polled and homo black as an added bonus.

Homo Polled, Homo Black. This Liner 56U son is off an outstanding 786T daughter we purchased at the National Trust sale in Brandon, MB. She was shown as a bred heifer that year at Ag-Ex and was crowned Junior Champion Female. She's what we think is the ultimate type cow; moderate, big bodied, angular, feminine, super fronted and good uddered. We sold her first daughter through this very sale as an open heifer to Rust Mountain View Ranch in North Dakota for \$15,250. In 2016 we sold a baldy black son to Todd Knupp, Weyburn, SK and last year a super Captain Black bull to Solberg Livestock, MT. 21E himself is really attractive, smooth made, thick and meaty. What a set of females this young bull would sire – they would be keepers.

Powerful, powerful best describes this bull. He was the gold medal winner for performance with an actual weaning weight of 1055lbs, a 205 day adjusted weaning weight of 963lbs and was the #1 indexing bull. He has a bigger birth weight but was born unassisted, had lots of vigor and just never stopped growing. His mother, the Elegante cow, is a big, soggy, Black Joker female who, as I write this, just calved. We have two really good daughters of hers in the herd, an El Tigre daughter and a Poker Face daughter. Both are really good young cows with good udders and lots of capacity. This big topped, big butted 56U son would sire some powerful steers and replacement heifers that would bring premiums for his new owner.

This good Priority son is owned by Wade Lund, our long time herdsman. The mother of 67E is a super uddered Liner 56U daughter that goes back to Wade's original Simmental purchase, CCC Tamale 1U, from Sandra Jeffery at one of the Simmsational sales. 1U had about as perfect an udder as you could get and her 56U daughter is just as impressive. We're really happy with the Priority bull. We purchased him from Kolton McIntosh at the 2015 Agribition show and bought him privately out of the stall. He'd just been named Reserve Junior Champion Bull Calf. This young son of his is very smooth made with lots of rib and shape. He would sire an outstanding set of heifers and steers for his new owner. His maternal sister in last year's sale was our high selling open heifer, selling to KT Ranches, Kelowna, BC for \$14,750.

Another black baldy bull, sired by Soda Pop 14B, a full brother to the Grand Champion Simmental Female at the Canadian Western Agribition this past year. 132E's dam is a blaze faced Liner 56U daughter going back to the blaze faced excellent Enticer daughter, 120W. There's four generations in a row in his pedigree that are all blaze faced. The baldy cattle are becoming very, very popular. The order buyers and feedlot operators like these cattle with a little chrome on them, knowing there is probably some Simmental influence in them to give them the gain-ability and carcass value they're looking for. And the baldy replacement females definitely bring a premium.

Homo Polled. What a great calving ease prospect this young, solid black Deputy bull is. With IPU Deputy, Cobra and Odin in his pedigree he has calving ease built right in and has a birth weight himself of 76lbs. He ranks in the top 2% of the breed for calving ease and the top 10% of the breed for birth weight EPD. He himself is very deep bodied, good quartered and smooth made. If you want to put hair on your cattle he has got it. Probably the hairiest bull we have ever sold and the right kind of hair. The feedlots love cattle with hair. We think this bull has a lot of future in him and he's also homo polled as a bonus.

Welcome to the 2018 bull sale from all of us at Meadow Acres Simmentals!

This is the Fifth year of writing an introduction to this bull sale and with each passing year it is a great opportunity for reflection of where we have been and where we are headed. First, a most sincere thank you to all of our customers. Without you there is none of this! We are honoured that you have made a choice to purchase Meadow Acres Genetics for your operations and we will work with you along the way to ensure that you have the genetics you require and a great experience in customer service. To potential customers, we work tirelessly to ensure we are bringing to you our very best genetics and have confidence in exceptional quality for your investment.

It's always a pleasure to work with Barry and his family and be a part of this sale, which is in its 38th year. Our programs are closely aligned and focused on passion for the cattle business and family based operations. It's always exciting to see the group of bulls that come together to create one of the most anticipated sales of the spring!

The set of bulls we have compiled this year are a group that we are very excited about and extremely proud of. A group that we already knew this time last year were going to be a great set of bulls and seeing them mature and get to sale time is always very satisfying as seedstock producers. There are bulls in the offering that will offer different attributes such as performance, maternal, calving ease etc. This group of bulls brings great consistency and also offers genetic diversity.

The Meadow Acres bulls have been on a rigorous herd health plan since birth. We work very closely with a team of veterinarians to establish the most reliable and consistent health protocols for our entire herd. We also work closely with Cargill Nutrition to ensure that our feed is all tested and analyzed to build our TMR ration that develops these bulls on their own natural do-ability. We believe that these bulls have been developed under the right conditions to promote longevity and soundness. Bulls will all be semen tested prior to sale time and are guaranteed. We also invest in colour and polled testing all of the bulls so there is no guess work when selecting the right bull for you. Free delivery is provided and we will take your bull home and care for him until we start delivery. For customers from the United States, our physical location is much closer to you then where our sale is held. We are only 30 minutes north of the North Gate Entry. We are pleased to complete required testing for export and coordinate delivery in a timely and efficient manner.

We are more than happy to visit with you in advance of the sale to discuss your herd bull needs and review what bulls would work for you. Please give us a call anytime, or better yet, we welcome you to visit the farm and see for yourself the bulls in their own environment and our operation first hand! All bulls will be videoed and available on our website www.meadowacressimmentals.com or www.cattlevids.ca in February. We have an excellent representation of professional sales staff to assist you in selection if you prefer and the sale will also be broadcast live on DLMS.ca.

We thank you for your interest and look forward to seeing you in Moose Jaw on March 2nd. We invite you to join us for lunch prior to the sale and some hospitality afterwards.

Homo Polled. This guy is really something special! When we were on our way home from trying to buy the Westcott bull, we were disappointed but happy to know we could still utilize him and this guy is exactly what we envisioned we could produce with Westcott. This Westcott/Horizon cross is potent and flat out awesome. We are so excited about this bull and his future within our great breed. We have worked hard to establish "our type" of cattle since starting out in the breed 9 years ago and this guy brings it all together for us. 224E has been a standout since birth, and he has had that herd bull presence to him since he was young. A bull you really have to admire for his overall thickness and how he is so soft made as well. He is huge middled, deep bodied, has excellent shape and structure to his hip and smooth through his shoulder. He carries his thickness and shape so well while being strong topped and he gets out and moves so freely. Overall a super complete bull, soggy made, long bodied and great haired. His mother is MAF Sprinkles 14A, a cow who we were lucky enough to get these calves off of and look forward to building her legacy through them. We are excited to be a part of this guy's future!

MAF MR 64E

Homo Polled. 64E is a great example of the Westcott sire group and why we are so high on them! This guy is very long bodied, thick and deep made. He is smooth, big nuted and moves out well. A bull you have to admire for this depth of quarter and overall look to him. His cherry red El Tigre mother was our favorite of the sire group as a bred heifer and has done a great job on this guy. She mirrors many of this guy's qualities; long bodied, deep, attractive, big footed and very good uddered. His maternal granddam is a cow that we flushed and have sold a daughter to Crowe Brothers and have retained all of her other daughters in herd. They have just calved out and have beautiful udders as well.

Homo Polled. It's easy to see why we are really excited about these Westcott sired cattle, as the consistency that they have, both bulls and females is just awesome! Here is another favourite in the bull pen, as 104E is wide topped and thick made. A bull that has to be appreciated for his depth of body, huge middle, strength of top for his amount of body he has to him and his overall balance. He is good footed and moves out well. A real meat wagon who has an excellent demeanor. What makes this bull even better is his Exciter dam. She is a favourite around here. A moderate female, big bodied, very sound, great uddered and is a consistent producer. We have retained 104E's maternal sister in herd and have sold maternal brothers to Gord Manz and Sentes Farms. Consistency and predictability is built into this guy for sure.

Polled. Another Westcott son that I could write all the same great qualities about. 108E is really dark red, he has a great hip on him, moderate made and long bodied. I like how easy doing these bulls are and the amount of middle they have. They just tie everything together so nicely into a real herd bull package, and 108E is just like this. His mother is another favourite cow here, an Accelerator daughter, that is a solid producing cow, attractive, nice uddered and big footed. 108E's maternal sister is an absolutely beautiful two year old and we are very excited about her future. Another sister sold to Hicks Simmentals.

Homo Polled. We never had a bad cross with our cow herd and Westcott, which was another bonus. The consistency in his sire groups in both the bull and heifer pen are certainly something to be admired and seen. Here is a bull that is dark red, lots of hair, soggy made, thick and moderate in his build. A bull with a lot of good things about him in his well balanced package. His dam is a big bodied Red Label daughter that milks hard and is sound made. 133E offers up a nice EPD profile with balance between performance and maternal traits.

maternal brother

MAF MR 122E

Homo Polled. 122E is another good looking Westcott son! This bull is thick with tons of middle and softness to him. A bull you really have to admire for the length of spine he has to complement his stoutness. He is nice boned, has large testicles and my favorite part about this guy is the momma cow and cow family that stands behind him. 178A is a hard working cow that has been a real herd bull producer. She is big bodied, big footed and good uddered. She is also a direct daughter of Shamrock 120L which I would say is one of the unsung big time cow families at LaBattes. We have quite a few Shamrock females in our herd and they are wicked! A maternal brother sold to Circle M Farms in 2016.

 Homo Polled. 72E is out of Brenna's first 4-H heifer, Ruby Queen, who we purchased from Ryan Cook at Agribition as a calf and what a great job she did on this guy! 72E is a Deputy son who ties a lot of good things together. He is moderate and tanky in his make up, really hairy and very docile. The girls have always had him as a favourite and say he is good because "he has a big butt and big nuts". I'm sure there aren't many kids in their school that could talk cattle the way these two girls can! A really nice EPD profile on this guy as well, and a bull with some versatility to him but one that will darn sure work.

**\$7,500.00****\$8,000.00***IPU Red Deputy 25C***55****MAF MR 92E****POLLED PUREBRED MALE****PG1203734****FBL 92E****18 January 2017**

Homo Polled. We were fortunate enough to obtain a semen package on Deputy from Dusty Kunkel in 2016. We thought he would be a good bull with some versatility to him, good to use on heifers but still able to use on some cows. 92E is an awesome result of breeding a second calver to Deputy. He has always had such a presence about him. He is strong and wide topped, thick and big middled. His mother is a young Marksman daughter that stems back to the Noremec 16M cow as well. She has a heifer that has just calved out bred by Deputy as we were so pleased with this cross. This guy will have lots of friends come sale day!

Homo Polled. 190E is a bull that is hard to fault! This guy is smooth made, yet has jam to him. He is thick and has one of the deepest rib shapes of any bull in the pen. Strong topped, large testicles, structurally sound, long bodied and absolutely wicked haired. You really have to admire how this bull ties it all together and is so soft in his design and free in his movement as well as his EPD profile. He is a result of IVF embryo work we had done on MAF Sprinkles 14A, a Horizon daughter we had sold to Swan Lake. We had some misfortune with her and she is no longer around. It is especially bad misfortune when you see these calves we were able to get. She was a soft made, huge middled, thick female that had a great udder. A female that we are proud to have raised and are excited for these bulls of hers to go and make their mark on the breed. We have a super sweet full sister to this guy in the replacement pen that we are equally excited about!

Homo Polled. This is without a doubt the best Royal Red son we have ever raised! 95E is a maternal sibling to 35E and 96E and the result of the flush on 287Z, a full sister to TNT Top Gun. It's not every day you are able to acquire genetics like this in the Simmental breed! Dark cherry red and extremely hard to fault, this bull deserves serious consideration. He is a herd bull to move your program into the future. He is so complete in his design, stout, long bodied, tons of rib shape, large testicles and he gets out and moves so freely. 95E definitely has a herd bull presence to him. If you consider the impact that Top Gun has made on the breed, and his mother who is perfect uddered, this bull has a world of potential for his new owners.

Homo Polled. 35E is a dark red bull that is a fresh twist on genetics here at Meadow Acres. We purchased a flush from Rust Mountain View Ranch on RUST Miss 287Z, who is a full sib to none other than TNT Top Gun! We ended up with this impressive set of ET sons of hers and are excited about each one of them! A full brother sold to Janzen Ranches from Rust Mountain in 2017. 35E is long bodied and thick made, is deep sided, and has a real presence about him. He is the right kind in phenotype and genetically is in the top 15% and 10% for weaning weight and yearling weight respectively. He started out at the moderate birth weight and has been impressive in his growth.

Homo Polled. Here is why we were pleased to utilize Cowtown on some of our cowherd! 70E is a bull you really have to appreciate for his natural muscle expression combined with his length of body and deep, soggy build. He was a bull that always caught your attention from a young age and the best part about this guy is his mom. 81X is a picture perfect Simmental cow, long bodied, big middled and a perfect udder. If you keep replacement females this guy should be on your list of considerations as the females on both sides of his pedigree are known for udder structure and quality.

Homo Polled. Rattler is a red Cobra son we sold in 2016 to Tyler Amundson and Maxwell Simmentals. We used him on heifers and on some second calvers as well. We sold a lot of the heifers bred this way in the female sale so we didn't have too many Rattler calves, which is too bad when you see bulls like this in the pen. 118E is out of a second calver, who is really long bodied, smooth made in a dark red, hairy package. He has a tick more frame size, is deep bodied, soft made and moves out free and easy. His dam is another dark red young El Tigre cow that is the right kind.

Homo Polled. Our only red Mafia son is an ET bull out of a beautifully made and phenotypically perfect cow whom we lost last year. 123E offers length of body, width of top, a great hip in an athletically made package. He is an outcross for a red pedigree and has two black parents. This bull has HUGE weaning and yearling weight numbers, which put him in the top 1% for weaning and top 2% for yearling weights in the breed. If your calves sell by the pound, check this guy out.

Polled. 230E is one of just two red Lotto sons we have this year. We sold Lotto last spring to Willow Creek Simmentals, so this will be the final group of Lotto sons we sell. This bull is long bodied, right full of red meat, with lots of middle and lots of hip.

My favorite part about this bull is hands down his dam. She is a beautiful young black cow, one of only a few Stout daughters we have. She has a picture perfect udder, she is moderate made with tons of middle to her and she always produces a good one. Her first calf was MAF Blackhawk 32C, who we sold to Packet Bros. in 2016. If you keep females, this guy has a pedigree to produce great ones!

Homo Polled Hetero Black. In 2016 we sold MAF King Cobra 3C and we were able to have the walking rights on him after he was done at stud. We used him AI on a few select cows and we were really pleased with the calves. They are very long bodied and built right when they come and grow like crazy. We lead off with this total stud, 42E. He possesses so much natural thickness, depth of body, as well as spring of rib. He is strong and wide topped and smooth made. 42E is a bull who knows he is awesome and will often be found showing off. He moves out extremely well and is very sound in his structure. He has explosive numbers for growth being in the top 1% of the breed for weaning weight and top 3% for yearling weight. His mother is a really nice cow, big bodied and good uddered. A maternal brother sold to Hoegl Livestock in 2016, produced a reserve division champion heifer calf at Agribition and has bred very well for them.

MAF MR 186E

Homo Polled, Hetero Black. A King Cobra son off a first calver that did a heck of a job! 186E is a baldy bull that is a very complete package. He is growthy, long bodied, thick, soft made and structurally correct. His dam is a KOP Spartan daughter we purchased from High Country as a calf and are very pleased with how she has developed - great bodied and uddered. This King Cobra son boasts some of the highest performance EPDs in the breed: a 90 Weaning weight and a whopping 127.9 for yearling weight. Adding pounds and chrome has never been a bad decision!

Homo Polled, Hetero Black. We are calving out the first Mafia daughters this year and we are extremely pleased with how they are doing; calve easy, very nice uddered and great mothers. 152E is a Mafia son that is one of my favorites in the black group. A bull that is explosive in his rib shape as well as thick made with tons of presence to him. He is wide topped, great haired and well balanced in phenotype as well as on paper. His mother is a larger framed black Red Baron daughter who quietly always produces a good one. We have a maternal sister retained and another maternal sister sold to Lewis Farms in 2016.

Homo Polled, Homo Black. This Mafia bull had a lot of friends this summer out on pasture and it's easy to see why! We really need to appreciate this bull with his rugged herd sire look, his length of body and impressive muscle design. An El Tigre grandson who has the same style as an El Tigre, being moderate and thick. His dam is an attractive Resistol daughter who is moderate framed, long bodied, big middled and milks hard, which is evident with this bull's moderate birth weight and a weaning weight of 1000lbs! Another bull who, on paper, brings a balance of all traits in a nicely rounded EPD profile.

Polled, Hetero Black. If you were impressed with the Westcott group of bulls but are looking for a black bull, this will be your bull! The only black Westcott in the offering, this bull is stout made, long bodied and wide topped. Backed by our leading Black Joker donor cow 403P, this bull will have the genetics to be a great breeding bull. Maternal brothers have sold to W2 Land & Cattle, Cory Pettersen, Allemand Ranches, Jerrad Schollar, Westway Farms and Hoegl Livestock. 403P has been a huge part of our program and we are calving out nine daughters this winter that we are really excited about. A maternal sister sold to Leewood Ranch in our 2016 female production sale as well.

Polled, Hetero Black. 117E provides a real punch of performance. An ET bull that is very long made, soggy and thick. This mating proved to be a great one as evident in these three full brothers, 117E, 187E and 204E. I like this bull for his smoothness and good bone and the amount of width and how much middle he has. His mother, 2W is another favorite around here; she is moderate framed and huge middled, great footed and very nice uddered with good teat size and placement. Common to the sire group, this guy is in the top 4th and 5th rankings in the breed for yearling and weaning weights respectively.

Homo Polled by parentage. One of our feature heifers. This is really an outstanding female sired by Cowboy Cut and out of the Pashmenia cow family that have been one of the best at our place. 317Z has produced some high sellers through this sale already. A Cobra daughter out of her was one of our high selling heifers in our 2016 sale, selling to Anchor D Ranch, AB and in last year's sale her El Tigre son sold for \$13,000 to Steve Graveley, MT. This heifer is stout, long bodied, stylish, homo polled by parentage and has an excellent pedigree – the kind to start a new cow family around.

A really good Priority daughter off a Poker Face dam we purchased from Downhill Simmentals, Everett Olson, MB. These Priority females are something pretty special and can't wait to get them into production. A lot of our top heifers are sired by Priority and with the great mother he has (a Wallbanger daughter that Kolton purchased as a high seller out of "Checkers" from Robb Farms), and an elite grandmother (a 56U cow that has risen to the top of Robb's black program, the 266Y cow that was purchased right out of this sale by the Robbs), we think Priority has a very bright future ahead of him. 90E herself is very broody looking, solid black, has a great hair coat, is deep ribbed and should make a great young cow.

Homo Black by parentage. Another Priority 3C baldy black heifer out of a really good young El Tigre daughter going back to the Black Joker Elegante cow family. We talk a lot about cow families in our footnotes. We think they are very important, and these families are good and predictable. This fancy Priority heifer is very feminine, and has a beautiful baldy face.

A Soda Pop daughter out of a black Horizon daughter going back to Black Jewel 6S, the mother of IPU Red Zone 16A. We haven't tested this heifer but are pretty sure she would be homo polled. She's moderate framed, very nice fronted and has her grandmother's capacity. She has a nice set of balanced EPDs. With Cream Soda and Black Jewel in her pedigree she should turn out very well for her new owner.

Homo Polled by parentage. I have no idea why we are selling this heifer as she has been a real favorite around here. We are committed to putting some top heifers in this sale and we believe this is one of the best we've offered. We absolutely love her mother. She might be my pick of the black El Tigre daughters and she goes back to the elite donor cow Pocahontas 105L, her great grandmother. This Priority heifer is broody, broody, has style to burn, lots of rib and capacity and is homo polled by parentage as an added bonus.

Another super MRK Priority 3C baldy heifer out of a really good uddered Ridgeline cow we purchased from the Bonchuks. You can see from these few Priority heifers in the sale what a job he is doing for us and Circle 7 Ranch, the Oberles. Priority himself has a beautiful blaze down the middle of his face and no other white. He's homo polled and homo black. This young March heifer has real opportunity ahead of her. She's angular, deep bodied, has an attractive baldy face, a great hair coat, is very correct and has brood cow written all over her.

Cool picture. Brodyn is the 4th generation LaBatte with his middle name Herbert.

A really nice Bartender daughter out of a great uddered Red Western daughter. In 2016 we bred or cleaned up most of our first and second calvers to Bartender 392B. He's a blood red Wheatland 680S grandson we purchased as the high seller out of the SIBL bull sale. His first daughters are just calving this year and it look like their going to have really nice udders. 103E is a moderate, deep bodied, broody heifer that should go on to make a good cow.

Another red feature heifer. This beautiful Red Deputy heifer is out of a daughter of Pocahontas 68M, 140B. Jim Marker of Bar M Simmentals, Gillette, WY purchased her in the 2015 Simmsational sale where she was the high selling female that day, selling for \$35,000. She's still here in Canada and Jim and I decided to leave her here and sell her progeny on a share basis. She is a beautiful uddered cow and looks very much like her elite donor dam Pocahontas 68M. Her Red Deputy heifer is a moderate framed, deep, angular, feminine, broody heifer with a great future ahead of her. We think this heifer calf has a great amount of potential for her new owner with her pedigree, style and broodiness.
